JUSTIFICAÇÃO

O Parque Nacional Serra da Canastra, situado na parte sudoeste do Estado de Minas Gerais, entre os meridianos 46°15` e 47°00` a oeste de Greenwich e os paralelos 20°00` e 20°30` da latitude sul, foi criado com o objetivo de proteger as nascentes do Rio São Francisco. O Decreto nº 70.355, publicado em 03 abril de 1972, definiu, aproximadamente, 200.000 ha, como sendo a área do Parque. Entretanto, no seu art. 4º, o Decreto ressaltou que as terras agricultáveis de alto valor poderiam ser excluídas da área inicial da Unidade de Conservação, desde que não afetassem as características ecológicas do Parque.

Dois anos após a criação do Parque, o Poder Executivo Federal publicou os Decretos nº 74.446 e 74.447, de 21 de agosto de 1974, delimitando uma área de aproximadamente 106.185,50 ha, como de interesse social para fins de desapropriação, com vistas a constituir, efetivamente, o Parque Nacional da Serra da Canastra. Cinco anos após a criação do Parque, em 1977, foram realizados o levantamento topográfico e a demarcação de uma área de 71.525 ha, que foi objeto de um conflituoso processo de desapropriação.

Em 1981, dez anos após a criação do Parque, foi elaborado e publicado o Plano de Manejo do Parque Nacional da Serra da Canastra, abrangendo a área de 71.525 ha. Nele foram estabelecidas regras, diretrizes e normas de uso, proteção e manejo dos recursos naturais. O referido Plano, ao abordar a situação legal do Parque, apontava, já naquela época, a desatualização dos Decretos nº 70.355, de 03/04/1972 e nº 74.446 e 74.447, de 21/08/1974, e, ainda, a necessidade de reformulação dos mesmos, *“sobretudo no que diz respeito aos limites e à superfície”*.

Em março de 2005, trinta e três anos após a criação do Parque, o IBAMA publicou o Novo Plano de Manejo do Parque Nacional da Serra da Canastra, para a

área estimada de aproximadamente 200.000 ha, ou seja, considerando a área prevista no decreto de criação do Parque e nunca efetivada. Concomitante, iniciou um processo de notificação aos órgãos públicos federais, estaduais e municipais, assim como para as pessoas físicas e jurídicas constituídas e residentes na área abrangida pelo novo Plano de Manejo, dificultando ou impedindo que se desse continuidade às atividades econômicas desenvolvidas na região.

Quando trata da questão fundiária, o Plano deixa claro o reconhecimento de que a efetivação da área total do Parque implica em um levantamento fundiário e desapropriação de, aproximadamente, 130 mil ha, os quais, acrescentamos, são compostos por terras produtivas.

Ademais, como bem ressalta o relatório do Grupo de Trabalho Interministerial do Parque Nacional da Serra da Canastra, ao longo de todos esses anos sucederam-se vários atos administrativos, como, por exemplo, a expedição de licenças ambientais e de títulos minerários (extração de quartzito e pesquisa mineral para diamante), que permitiram a instalação de novas atividades na área remanescente de aproximadamente 130 mil hectares, ao passo que atividades nela exercidas tradicionalmente (agricultura e pecuária) se consolidavam; todas em conflito com os objetivos de um parque nacional.

Cada UC, assim como o mosaico de unidades de conservação, deve possuir um conselho consultivo ou deliberativo, conforme o caso, constituído por representantes da sociedade e das comunidades locais, além do Governo. No caso do PNSC, essa condição tem permitido à sociedade intervir no processo, dando-lhe maior legitimidade e chance de conciliar a preservação ambiental com o bem-estar da comunidade. Nesse sentido, as reivindicações encaminhadas pelo Conselho Consultivo, com o propósito de se rever os limites do PNSC, assumem relevância ainda maior e possibilitam vislumbrar uma gestão participativa do mosaico de unidades de conservação pretendido para a região.

Diante desse conturbado histórico e do contexto atual, em que se buscam soluções para as diversas unidades de conservação que não têm sua situação fundiária bem definida, abraçamos a causa do PARNA da Serra da Canastra, tentando servir de mediadores para a sociedade local e o governo, na construção conjunta de uma solução para a questão.

Com esse intuito, desde 2005, promovemos a realização de diversas reuniões, contando com a participação do Governo Federal, Governo Estadual, Prefeituras, Advocacia Geral da União, Ministério Público e membros do Conselho Consultivo do Parque Nacional da Serra da Canastra. Como resultado dessa série de discussões e esclarecimentos, foi criado um Grupo de Trabalho Interministerial – GTI, responsável por dar um parecer acerca da situação do Parque.

Em suas conclusões, o GTI propôs que sejam revistos os limites do Parque, apontando, entre outras questões:

- que as áreas retiradas dos limites originais do PNSC necessariamente sejam mantidas como unidades de conservação;
- seja criada APA no entorno do PNSC, observando, no mínimo, os seguintes requisitos:

“o limite sul da APA se estenda até o eixo do Rio Grande; contemple as nascentes do Rio Samburá;”

Em face dos entendimentos e parceria estabelecida entre o Parlamento e o Executivo estamos apresentando o Projeto de Lei recomendado pelo Grupo de Trabalho, alterando a área do PNSC e dando conformação ao mosaico de unidades de conservação da Serra da Canastra. Para tanto, consideramos os apontamentos feitos pelo GTI, no sentido de se configurar na região um mosaico de unidades de conservação composto por:

- PARNA da Serra da Canastra, com seus limites definidos em outro projeto de lei apresentado;
- Área de Proteção Ambiental - APA da Serra da Canastra, englobando a área excluída dos limites originais do Parque, objeto deste projeto de lei;
- Monumento Natural da Bacia do Rio Samburá, englobando a nascente geográfica do Rio São Francisco, objeto de um terceiro projeto de lei.

Para se chegar à definição dos limites propostos para a APA da Serra da Canastra, objeto deste projeto de lei, foram realizados, além dos trabalhos cartográficos, trabalhos de campo sob a coordenação da EMATER-MG, que foi a responsável pelo georreferenciamento de propriedades rurais e áreas minerárias.

A proposta resulta na proteção de uma área de 47.516,15 ha, excluída da área original do PNSC, de 197.797,05 ha. A APA seria assim distribuída entre os municípios:

Áreas da APA da Serra da Canastra por município

	Área (hectares)
Capitólio	9.588,69
Delfinópolis	15.736,29
Sacramento	0,00
São João Batista do Glória	6.286,22
São Roque de Minas	7.841,33
Vargem Bonita	8.063,64
Área total	47.516,17

Acreditamos que, nos moldes propostos, este projeto de lei, tramitando apensado aos outros dois projetos associados, seja uma solução consensual que permitirá a efetiva atuação do órgão ambiental na gestão eficiente das unidades de conservação, bem como atenderá aos anseios da comunidade, sem que, com isso, deixe-se de promover a devida preservação ambiental da rica região da Serra da Canastra.

Diante do exposto, apresentamos este projeto de lei, esperando dos nobres pares o apoio necessário para a sua breve tramitação.

pelo Córrego da Serra, em direção sudeste, até o desaguadouro desse Córrego, no Ribeirão Turvo, na interseção da longitude 46 12' 02" W com a latitude de 20 32' 09" S (Ponto 16); seguindo o curso desse Ribeirão, desde a latitude 20 32' 09" S, na cota de altitude de 900 m, até a estrada que liga Furnas a Capitólio, junto à Ponte da Enseada, na margem direita da Represa de Furnas, no ponto de latitude 20 35' 29" S e de longitude 46 13' 18" W (Ponto 17); daí, virando para oeste, seguindo a margem direita da mesma estrada e da Represa de Furnas, até a Barragem de Furnas, no ponto de latitude 20 38' 55" S e longitude 46 18' 51" W (Ponto 18); daí, partindo da estrada que atravessa a barragem de Furnas, à sua margem direita, acima do mirante, a linha divisória do Parque toma o rumo noroeste, numa linha sinuosa, acompanhando a cota de 800 m de altitude, que divide o Vale do Rio Grande (Represa de Peixotos) do sopé do Chapadão da Babilônia, até atingir o Ribeirão Grande, no ponto de longitude 46 30' 02" W e latitude 20 30' 22" S (Ponto 19); desse ponto, tomando rumo norte, cruzando o ribeirão, numa linha reta de 2 km, até atingir a interseção da latitude 20 37' 35" S com a longitude 46 30' 03" W (Ponto 20); daí, acompanhando a cota de altitude de 1.000 m, toma rumo oeste contornando o Vale do Ribeirão Grande, tomando em seguida o rumo sul, na mesma cota de 1.000 m, no sopé da Serra de Santa Maria, até alcançar o ponto de interseção da longitude 46 33' 21" W com a latitude 20 30' 29" S, na foz do Ribeirão Grande, à altura da Represa de Furnas (Ponto 21); deste ponto, segue novamente a direção noroeste, numa linha sinuosa, seguindo a cota de altitude de 800 m, até alcançar a interseção da margem esquerda do Rio Santo Antônio com a Represa dos Peixotos, próximo à ponte sobre esse rio; aproximadamente a 7 km ao norte da localidade de Delfinópolis, no ponto de latitude 20 16' 48" S e longitude 46 52' 17'

W (Ponto 22); daí, segue o rumo leste, acompanhando a cota de 900 m que divide o vale do Rio Santo Antônio da Serra Preta, até atingir o ponto de longitude 46 43' 14" W e latitude 20 18' 55" S (Ponto 23); desse local, tomando o rumo norte, em linha reta numa distância de 3 km, sobre a longitude 46 43' 14" W, até a latitude 20 17' 08" S (Ponto 24); daí, tomando novamente o rumo noroeste, no sopé da Serra do Cemitério, seguindo a cota de 800 m, numa linha sinuosa, até atingir a interseção da longitude 46 57' 25" W com a latitude de 20 11' 30" S (Ponto 25); desse ponto, tomando o rumo oeste, numa linha reta sobre a latitude 20 11' 30" S, numa distância aproximadamente de 5 km, até atingir o Ribeirão do Engano, ponto inicial do Parque (Ponto 1).

Art. 3º A área patrimonial do Parque Nacional da Serra da Canastra fica sob a administração e jurisdição do Instituto Brasileiro de Desenvolvimento Florestal do Ministério da Agricultura.

Art. 4º Das áreas definidas no art. 2º do presente Decreto poderão ser excluídas, a critério do Instituto Brasileiro de Desenvolvimento Florestal, aquelas que tenham alto valor agricultável, desde que esta exclusão não afete as características ecológicas do Parque.

Art. 5º Fica o Ministério da Agricultura, através do seu órgão competente, autorizado a promover as desapropriações necessárias à execução do presente Decreto.

Art. 6º O presente Decreto entra em vigor na data de sua publicação.

COMISSÃO DE MEIO AMBIENTE E DESENVOLVIMENTO SUSTENTÁVEL

I - RELATÓRIO

O Projeto de Lei nº 1.517/2007, de autoria dos ilustres deputados Carlos Melles, Odair Cunha, Maria do Carmo Lara, Geraldo Thadeu e Rafael Guerra, cria a Área de Proteção Ambiental da Serra da Canastra, que passa a compor o mosaico de unidades de conservação da Serra da Canastra, nos termos do art. 26 da Lei nº 9.985/2000.

O art. 1º estabelece que os limites da APA constam no Anexo I, em nove memoriais descritivos elaborados a partir das áreas excluídas do Parque Nacional da Serra da Canastra pelo Projeto de Lei nº 1.448/2007, dos mesmos autores. Os nove polígonos resultantes abrangem 47.516,17 hectares, delimitados por 11.105 vértices.

Na justificação, os autores esclarecem que, decorridas três décadas da criação do Parque, houve a implantação de somente 71.525 hectares, dos 200 mil originalmente previstos. Nesse período, intensa atividade agropecuária estabeleceu-se nos 130 mil hectares restantes. Parte da área desenvolveu também atividades minerárias, com títulos concedidos pelo Departamento Nacional de Produção Mineral – DNPM, e as devidas licenças ambientais para exploração do subsolo.

Para definir as áreas que compõem a APA, os autores mencionam levantamento de campo realizado pela EMATER-MG, responsável pelo georreferenciamento dos polígonos.

Encerrado o prazo, não foram apresentadas emendas.

II - VOTO DO RELATOR

Os autores do Projeto de Lei nº 1.517/2007 assumiram tarefa de considerável envergadura, apresentando uma solução oportuna e viável para a regularização fundiária e total implantação do Parque Nacional da Serra da Canastra – PNSC. Essa iniciativa passa pela adequação do Parque às condições atuais de uso do solo na região, representado pelo Projeto de Lei nº 1.448/2007 (dos mesmos autores) e a concomitante criação de uma área de proteção ambiental nas terras a serem desafetadas do Parque, criado pelo Decreto nº 70.355/1972.

A partir de 2005, a Câmara dos Deputados realizou diversas reuniões, contando com a participação do Governo Federal, Governo Estadual, Prefeituras, Advocacia Geral da União, Ministério Público e membros do Conselho Consultivo do Parque Nacional da Serra da Canastra. Como resultado dessa série de discussões e esclarecimentos, foi criado um Grupo de Trabalho Interministerial – GTI, responsável por um parecer acerca da situação do Parque.

Entre as conclusões do GTI, transcritas na Justificação do projeto de lei e aqui repetidas, propõe-se que sejam revistos os limites do Parque, apontando, entre outras questões:

- que as áreas a serem incorporadas ao PNSC apresentem atributos ecológicos significativos e estejam em consonância com os objetivos do Parque quanto à proteção de nascentes e áreas de infiltração de bacias da região;
- que as áreas retiradas dos limites originais do PNSC necessariamente sejam mantidas como unidades de conservação;
- a necessidade de se considerar, na avaliação de áreas passíveis de retirada do Parque:
 - *“a degradação ou impacto por atividades antrópicas;*
 - *não possuírem atributos ecológicos de alta relevância;*
 - *possuírem indicadores de relevante potencial econômico e social;*
 - *implantação de obras de infra-estrutura (especialmente linha de transmissão de energia elétrica de FURNAS);”*
- seja criada APA no entorno do PNSC, observando, no mínimo, os seguintes requisitos:

Considerando as conclusões do GTI, e a morosidade do governo em tomar as iniciativas necessárias, os nobres deputados protocolaram o Projeto de Lei nº 1.448/2007, redefinindo os limites do Parque Nacional da Serra da Canastra. Atenderam também à recomendação de criar uma Área de Proteção Ambiental – APA, englobando a área excluída dos limites originais do Parque, objeto do projeto de lei em tela. Ambos os projetos de lei devem tramitar conjuntamente, pois compõem um mosaico de unidades de conservação, nos termos definidos pelo

Sistema Nacional de Unidades de Conservação da Natureza – SNUC (Lei nº 9.985/2000, art. 26).

Particpei, como titular da Comissão de Meio Ambiente e Desenvolvimento Sustentável, de algumas dessas reuniões, inclusive da Audiência Pública promovida nesta Casa em 18 agosto de 2005. Em decorrência disso, viajei à região e conheci in loco as áreas que são mencionadas nos dois projetos de lei relativos ao mosaico de unidades de conservação da Serra da Canastra.

Considerando a complementaridade entre as duas proposições, a relevância biológica e cultural da Serra da Canastra e o apoio da comunidade local às unidades de conservação, voto pela aprovação do Projeto de Lei nº 1.517/2007.

Sala da Comissão, em 13 de março de 2008.

VOTO EM SEPARADO DEPUTADO REGIS DE OLIVEIRA

Trata-se de Projeto de lei de autoria dos ilustres deputados Carlos Melles, Odair Cunha, Maria do Carmo Lara, Geraldo Thadeu e Rafael Guerra, que visa à criação da Área de Proteção da Serra da Canastra, localizada no Estado de Minas Gerais, com os limites constantes no Anexo I, abrangendo as áreas suprimidas dos limites originais do Parque Nacional da Serra da Canastra, constantes em levantamento realizado em maio de 2007.

Como justificativa, os autores alegam que “diante do conturbado histórico e do contexto atual, em que se buscam soluções para as diversas unidades de conservação que não tem sua situação fundiária bem definida, abraçamos a causa do PARNA da Serra da Canastra, tentando servir de mediadores para a sociedade local e o governo, na construção conjunta de uma solução para a questão.”

Submetido à Comissão de Meio Ambiente e Desenvolvimento Sustentável, o Projeto de lei foi aprovado nos termos do parecer do ilustre relator, deputado Fernando Gabeira.

É o relatório.

VOTO.

Quanto aos aspectos constitucional, jurídico e de boa técnica, a proposta em questão atende aos pressupostos formais e materiais previstos na Constituição federal e está em conformidade com os princípios e normas do ordenamento jurídico brasileiro.

A Constituição Federal dispõe:

“Art. 225. Todos têm direito ao meio ambiente ecologicamente equilibrado, bem de uso comum do povo e essencial à sadia qualidade de vida, impondo-se ao Poder Público e à coletividade o dever de defendê-lo e preservá-lo para as presentes e futuras gerações.

§ 1º - Para assegurar a efetividade desse direito, incumbe ao Poder Público:

III - definir, em todas as unidades da Federação, espaços territoriais e seus componentes a serem especialmente protegidos, sendo a alteração e a supressão permitidas somente através de lei, vedada

qualquer utilização que comprometa a integridade dos atributos que justifiquem sua proteção. (gn)

O dispositivo acima mencionado determina que sejam delimitadas, em cada Estado e no Distrito Federal, áreas de relevância ecológica, dignas de proteção por representarem um determinado ecossistema.

Na lição de José Afonso da Silva, espaços territoriais especialmente protegidos são “áreas geográficas públicas ou privadas (porção do território nacional) dotadas de atributos ambientais que requeiram sua sujeição, pela lei, a um regime jurídico de interesse público que implique sua relativa imodificabilidade e sua utilização sustentada, tendo em vista a preservação e proteção da integridade de amostras de toda a diversidade de ecossistemas, a proteção aos processos evolutivos das espécies, a preservação e proteção dos recursos naturais”. (“Comentário Contextual à Constituição”, 4ª edição, São Paulo: Ed. Malheiros, 2007, p. 842).

O Parque Nacional da Serra da Canastra é uma área geográfica pública, localizada no centro-sul do Estado de Minas Gerais. É um dos mais importantes parques nacionais brasileiros, criado em 03 de abril de 1972 através do decreto 70.355. Posteriormente, o Poder Executivo Federal publicou os Decretos nºs 74.446 e 74.447, de 21 de agosto de 1974 definindo, aproximadamente, a área do Parque.

Além disso, o Parque abrange uma parte montanhosa da Mata Atlântica e do Cerrado e sua proteção se faz necessária uma vez que abriga inúmeras espécies de fauna e flora, muitas ameaçadas de extinção, como é o caso do tamanduá-bandeira e do lobo guará. Além disso, a água é um fator preponderante no Parque que abriga centenas de nascentes, em especial, a nascente do Rio São Francisco.

Não há dúvidas quanto à necessidade de preservar as características naturais relevantes do Parque. Com esse nobre propósito, o projeto de lei em questão visa à proteção com base nos limites originais disponibilizados pelo Ministério do Meio Ambiente, que engloba importante parte desse ecossistema.

Em outras palavras, a preservação da Serra da Canastra deve ser integral compreendendo a área inicial de 200 mil hectares. É o que pretende a proposição, ampliar a área de preservação do Parque Nacional da Serra da Canastra.

As características biofísicas singulares da Serra da Canastra merecem receber do Estado proteção efetiva e permanente que garantam a sua integridade física sem perda do seu valor ambiental.

Diante do exposto, o voto é pela constitucionalidade, juridicidade e boa-técnica legislativa do Projeto de lei nº 1517/07. No mais, pela aprovação.

Sala da Comissão, 09 de junho de 2010.

Deputado Regis de Oliveira

VOTO EM SEPARADO

Aludido Projeto de Lei cria a Área de Proteção Ambiental da Serra da Canastra, que passa a compor o mosaico de unidades de conservação da Serra da Canastra, nos termos do artigo 26 da Lei nº 9.985, de 2000.

A criação de tal APA, se dará em área a ser excluída do Parque Nacional da Serra da Canastra, nos termos do Projeto de Lei Nº 1.448/07, cujo Autor e Relator são os mesmos do presente Projeto de Lei.

O Parque Nacional da Serra da Canastra, com uma área de aproximadamente 197.787 hectares, foi criado por meio do Decreto nº 70.355, de 03 de abril de 1972, com o objetivo primordial de proteger a principal região das nascentes do rio São Francisco. A Serra da Canastra é o divisor de duas importantes bacias hidrográficas brasileiras, a do rio São Francisco e a do rio Paraná.

Conforme depreende-se do disposto na Informação Técnica nº 056/09 – 4ª CCR -MPF, de autoria do Analista Pericial, Geólogo Humberto Alcântara F. Lima, datada de 09 de março de 2009:

”Para avaliar a pressão exercida pela extração de recursos minerais dentro do Parque Nacional da Serra da Canastra, considerando apenas dados oficiais, efetuamos levantamento dos títulos minerários emitidos ou requeridos, disponíveis em 19 de fevereiro de 2009 no sítio eletrônico do DNPM. Tal exame mostrou que 106 polígonos minerários estão completamente contidos dentro do Parque, dos quais, 35 possuem autorização para extrair quartzito pelo regime de licenciamento, 54 são áreas com autorização de pesquisa (45 para diamante industrial, 07 para quartzito, 01 para quartzo e 01 para ouro), 05 (04 para quartzito e 01 para diamante) estão na fase de requerimento de lavra, onde o empreendedor já solicitou ao DNPM a licença para iniciar a extração do bem mineral, e 08 polígonos foram requeridos para pesquisa (05 para diamante industrial e 03 para quartzito). Alterando a forma de avaliação, considerando em vez de polígonos completamente contidos, aqueles com centróide dentro do Parque, passamos a ter 130 processos minerários com porção relevante de sua área, ou sua totalidade, no Parque Nacional da Serra da Canastra. O quartzito e o diamante/diamante industrial são os bens minerais mais requeridos nos processos minerários com interferência no Parque. O quartzito é utilizado como rocha ornamental, principalmente revestimento. De acordo com informações do Relatório do Grupo de Trabalho Interministerial – GTI instituído pelo decreto de 24 de janeiro de 2006, relativo ao Parque Nacional da Serra da Canastra, a extração de recursos minerais, efetuada por empreendimentos formais e informais, encontra-se paralisada.”

Ainda, sobre o tema, o Geólogo segue:

“Considerando a eventual criação de Áreas de Proteção Ambiental - APAs, pelo PL 1517/2007, em território atualmente do Parque, essas teriam 69 polígonos minerários com centróide situado dentro das mesmas. Desses 69, 33 possuem autorização para extrair pelo regime de licenciamento. Portanto, é necessário salientar que na eventualidade da alteração dos limites do Parque e criação de APAs, da maneira como proposto pelos PLs em exame, *pelo menos 61 polígonos de processos minerários permaneceriam dentro do Parque*, 03 destes já com autorização para extrair quartzito, pelo regime de licenciamento. Ressalta-se que a extração de recursos minerais é incompatível com uma UC de proteção integral, como o Parque Nacional da Serra da Canastra. Sobre o aproveitamento do quartzito, único bem mineral de relevância econômica que é extraído no Parque, sabe-se que é abundante em áreas próximas e exteriores aos limites do mesmo. Com relação ao bem mineral diamante, o que ocorre na região da Serra da Canastra e vizinhanças é um potencial para a existência de depósitos diamantíferos econômicos. Esse potencial é baseado na presença de corpos kimberlíticos (rocha que pode conter diamante primário) na área e na constatação de um corpo mineralizado (Kimberlito Canastra 01). As informações disponíveis indicam, por dedução, que o Kimberlito Canastra 01 está localizado dentro do Parque. O Canastra 01 é o primeiro kimberlito mineralizado relatado no Brasil e foi objeto de lavra experimental pela SAMSUL – Mineração do Sul LTDA. Informação sobre o tema, disponível no relatório do Ibama, já mencionado, indicam que o depósito do Canastra 01 é de pequeno porte com vida útil de 4 anos.”

Ora, a diminuição da área inicial do Parque, com a criação da Área de Proteção Ambiental da Serra da Canastra, diminui, na mesma proporção, a proteção dos recursos ambientais nela presentes, e no seu próprio entorno.

Ocorre assim, a questionável mudança de categoria de proteção integral para uso sustentável. Desta forma, por se tratar de um divisor de águas e do berço do rio São Francisco, toda a disponibilidade hídrica do mesmo, poderá ficar, seriamente afetada.

Por outro lado, a criação da APA, conforme amplamente demonstrado, não vai inibir a exploração de recursos minerais, inclusive, no interior do Parque Nacional.

Em face de tais aspectos o Projeto de Lei em referência incorre em incontestável inconstitucionalidade, senão vejamos:

No âmbito do art. 225 da Constituição Federal, a eventual aprovação da presente proposição, não guarda rigor constitucional, haja visto o disposto no inciso III de tal artigo, que assegurará que as eventuais alterações e supressões, só sejam materializadas com a garantia que a integridade dos atributos que justificaram a criação da unidade, a ser alterada, seja mantida.

Ora, a alteração vai possibilitar uma demasiada exploração minerária - 69 polígonos minerários, o que por si só já seria suficiente para fulminar o aludido projeto de lei como inconstitucional, em face a alteração dos atributos que justificaram a criação do Parque, mas vai mais além porque irá comprometer de forma profunda os recursos hídricos ali existentes que são formadores, inclusive, das Bacias do Rio Paraná e do Rio São Francisco.

Ademais, ao se propor a alteração para uma categoria de unidade de conservação mais permissiva, em termos de intervenção humana e proteção de seus atributos naturais, necessariamente, este dispositivo constitucional não estará sendo observado.

“Art. 225. Todos têm direito ao meio ambiente ecologicamente equilibrado, bem de uso comum do povo e essencial à sadia qualidade de vida, impondo-se ao Poder Público e à coletividade o dever de defendê-lo e preservá-lo para as presentes e futuras gerações.

§ 1º - Para assegurar a efetividade desse direito, incumbe ao Poder Público:

III - definir, em todas as unidades da Federação, espaços territoriais e seus componentes a serem especialmente protegidos, sendo a alteração e a supressão permitidas somente através de lei, **vedada qualquer utilização que comprometa a integridade dos atributos que justifiquem sua proteção;**” (grifamos)

Em razão de tais aspectos voto pela inconstitucionalidade do referido Projeto de Lei.
